

Enrolment selection criteria for non-local students

Endeavour's criteria for enrolment is based on the NSW Department of Education's *Enrolment of Students in NSW Government Schools* policy, available on the Department's internet site at <https://policies.education.nsw.gov.au/policy-library/policies/enrolment-of-students-in-nsw-government-schools>

For our Targeted Sports Program we apply criteria that reflect the following:

1. This is a sporting development program catering for highly talented student athletes.
2. We have a range of partnerships with elite sporting organisations to support our aim of providing a talent development pathway into elite sport. Our criteria have been developed in consultation with them.
3. Becoming an elite athlete involves more than just physical ability; it requires characteristics such as coachability, resilience, self-motivation, discipline, demonstrated respect for authority and the team. These attributes are recognised in leading research in the field.
4. Endeavour has 16 sports for both males and females that require student athletes. Numbers for each sport may vary from year to year depending on the circumstances.
5. We maintain a buffer to enable student athletes to enrol during later years if they are identified by our talent scouts.
