Message from the Principal

At Endeavour we believe that there is nothing more important than your learning. To reach your academic potential you will be required to demonstrate diligence and sustained effort to all learning tasks.

You have begun the most important two years of your school life; your senior years will reward dedication and hard work. The best resources you have during this period are your teachers, and it is important that you form strong partnerships with them to deliver the best possible results.

Whilst you may be engaged in a range of activities both inside and outside of school, your learning should always come first. Your HSC is something you keep for life and will be used to open doors to future success.

This Year 11 assessment guide contains carefully designed course assessment schedules, each highlighting formal tasks at a precise date. Teachers will also implement informal strategies to improve your learning.

We want students at Endeavour to reach their potential and expand their intelligence and abilities. I look forward to sharing this journey with you in a learning environment that guarantees academic success.

James Kozlowski

STUDENTS RESPONSIBILITIES

Each student has the responsibility to:

- understand the NESA course requirements and procedures for each course of study
- attend school, be aware of due dates for assessment tasks and complete tasks on time
- provide written evidence (for example a Doctor's Certificate) of reason for absence from formal assessment tasks
- provide written evidence (for example a Doctor's Certificate) of reason for late submission of formal assessment tasks
- if suitable, provide a Doctor's Certificate if a task is not submitted on the due date
- use school diary to record set homework, assessment task times and details of formative assessments set by your teacher
- plan a study timetable that gives careful consideration to the requirements of assessment tasks in his/her overall pattern of study
- seek help and advice from the teaching staff and HSC mentor
- be present to do all in school assessment tasks. This means being present all day on the day a task is due
- be on time for all assessment tasks
- apply himself/herself to the best of his/her ability to all coursework.

HSC ASSESSMENT POLICY

1. Assessment calendar

- 1.1. Students will be issued with a booklet showing the proposed assessable task in all courses. The calendar will give the task name and week for completion. The booklet will also be available on the schools website and emailed home. A student signature is required on receipt of the booklet.
- 1.2. Notice will be given for each specific task. HT's and class teachers will give details of the task in writing including: date, detailed task description, outcomes assessed, marking criteria and any special rules. Two weeks' notice will normally be given for variations to the published assessment Calendar or content of tasks. For each task students will sign the assessment task receipt register.
- 1.3. No assessable task will be set for submission on the last day of term, although students may be required to complete practical work and hand in associated materials.

2. Late Submissions

- 2.1. If an assessable task has to be submitted and if a student fails to do so by the specified date and time as set out in the assessment notification, a zero mark will be given, unless a note and medical certificate giving acceptable reasons is given to the teacher, Head teacher or Deputy Principal. This should be given on the first day of the student's return to school. *Refer to 6.*
- 2.2. If a student fails to hand in an assessment task before the holiday period a zero mark will be given unless **6.1** or **6.2** is satisfied.
- 2.3. Medical certificates are necessary if medical reasons are given for late submission. They should be produced on the first day of the students return.
- 2.4. If a student misses scheduled classes or arrives late on an assessable task day without a valid reason a zero mark will be given.
- 2.5. If a student is absent from school on the day before an assessable task without a valid reason a zero mark will be given.

3. Non-submission and non-serious attempt of assessable tasks

- 3.1. A zero mark will be given for non-submission of an assessable task or non-serious attempt of an assessable task.
- 3.2. Any student who enters a non-serious attempt (including but not restricted to inappropriate comments to questions, challenging markers to take away marks, making abusive, rude or derogatory comments, inappropriate diagrams) will receive zero marks for that assessment task. Students will be required to re-attempt the assessment task in order to satisfy course outcomes.
- 3.3. ICT issues are not a valid reason for non-submission of a task.
- 3.4. Written notification will be given to parents/carers on each occurrence of a zero assessment mark.

4. Non-Attendance at a test, exam, field study, practical test

- 4.1. If a student fails to attend an assessment task (examination, field study, practical task, presentation) the student's parent/guardian must notify the school by telephone or SMS on the morning of the task, stating the reason/s for non-attendance. A zero mark will be given, unless a note and/or medical certificate, giving reasons is provided to the DP on the first day back at school.
- 4.2. If a valid reason is given for non-attendance (illness or approved leave) then a mark will be awarded, based on a substitute/alternative task. Failure to complete a substitute/alternative task will mean a zero mark will be given.
- 4.3. In exceptional circumstances, an estimate based on appropriate evidence will be used, where the completion of a substitute/alternate task is not feasible, is unreasonable, or where the missed task is difficult to duplicate.
- 4.4. If a student is late for a test, practical task or examination, no extra time will be given except in extraordinary circumstances.
- 4.5. If no valid reason for non-attendance is given, a zero mark will be awarded.
- 4.6. If a student misses scheduled classes on the day before or during the day of an assessable task, without a valid reason, a zero mark will be awarded.

5. Malpractice, plagiarism and Cheating

- 5.1. If a student cheats during assessable tasks or examinations, home assignments, essays, projects or tests, a zero mark will be awarded.
- 5.2. If a student submits a prepared task that the teacher believes is not entirely the student's own work, the student may be required to reproduce the work under examination conditions. Failure to do so will result in a zero mark being awarded.
- 5.3. No mobile phones are to be brought into the room during an assessment task or examination. If a phone rings or is seen during the task or exam this will be regarded as an attempt to cheat and will result in a zero mark being awarded.
- 5.4. If a student submits a piece of work identical to that of another student, and is known to be the work of another student or has been shared by the creator of the task, both students will receive a mark of zero for the task.

6. Valid reasons for non-attendance, late submissions and lateness

- 6.1. Medical reasons (as in 2.3): Illness
- 6.2. Non-medical Reasons: Approved leave - Approval by the Principal/Delegate.
 - 6.2.1. These reasons may be various and include: funerals, interpreting, urgent family travel, personal problems, school commitments, external examinations, specialist appointments, and representative sport.
 - 6.2.2. The appropriate documentation must be submitted by the student (see appendix, Assessment Variation 1 and 2)

7. Unapproved Leave

- 7.1 From time to time parents request exemption from school for vacation purposes. Some of these occur during Examination and Assessment periods. This is of concern, particularly during Year 12.

Exemptions will not automatically be approved as per the following extracts from the DEC Attendance Policy:

6.1. Principals can decline to accept an explanation for an absence and record the absence as 'unjustified'. The parent should be advised that the explanation has not been accepted and a reason for the decision provided.

14.1. From the beginning of 2015, family holidays and travel are no longer considered under the Exemption from School -Procedures. Travel outside of school vacation period is now counted as an absence for statistical purposes

Should parents still decide to take their children out of school for vacation purposes, the leave is not 'approved' and students will NOT be eligible for misadventure if an assessment task or examination is missed due to non-attendance at school and a zero mark will be recorded.

8. Invalid task

- 8.1 In the case that a task is deemed invalid, advice will be sought from NESA and a determination decided upon by the appeals committee.

9. Appeals process

- 9.1. A student may appeal to the School Appeals Committee regarding procedures of the assessment process. The committee will comprise - DP, course HT, Stage Coordinator to represent the student.
- 9.2. Such an appeal will not be considered without reasons stated in writing.
- 9.3. An Appeal cannot be made on the basis of a teacher's professional judgement and awarded mark.

10. Plagiarism

- 10.1 Plagiarism can be viewed as the product of poor task/assessment preparation, research skills, and lack of confidence or many other variables. Opportunities for plagiarism have spread with increased access to the internet. In the end it is an act that can potentially provide an unfair advantage to a student in terms of other candidates in the same course.

Definition: plagiarism includes using work of another individual and presenting it as one's own (Macquarie University, Plagiarism Policy, 2003)

The following examples would be classed as plagiarism:

- Downloading an assignment from an online source and submitting it as your own work
- Buying, stealing or borrowing an assignment and submitting it as your own work
- Copying, cutting and pasting text from an electronic source and submitting it as your own work

- Using the words of someone else and presenting them as your own (e.g. presenting an assessment task done by a current ex-student as your own)
- Relying too much on other people's material – i.e. repeated long quotations.

(The Learning Centre, Avoiding Plagiarism, UNSW)

Strategies to avoid Plagiarism

- Make sure you understand the set assessment task and sub-components of the task (Assessment task description, outcomes assessed, marking criteria and any specific rules for the task). If you are not clear of the requirements, ask your teacher and ensure you do this when the task is handed out, rather than leaving it too late to effectively complete the task.
- Plan your resources to thoroughly research the set task. Quality investigation takes time, organisation and management.
- Access only relevant material and a variety of resources if appropriate. If resources are suggested for the assignment/project then make sure that you understand these before other resources/references are considered.
- Acknowledge all sources i.e. books, journals, web pages, letters, films, interviews, lectures, newspapers, etc.
- Avoid excessive passages by another author, even where the sources are acknowledged. Find another form of words to show that you have thoughts about the material and understood it, stating clearly where you found your ideas.

Consequences of Plagiarism:

Plagiarism is a form of malpractice and as such a **zero will be awarded to any student who is guilty of actively plagiarising**

11. Illness or Misadventure Appeals

- 11.1 If the performance of a student is adversely affected by an illness or misadventure then the student may complete an Illness or Misadventure Appeal Form. Forms are available from the Deputy Principal, Head Teachers or the School Counsellor.

For Illness or Misadventure appeals to be considered, students must notify the Head Teacher or Deputy Principal on the day of the task and all evidence associated with the appeal must be included (attached). If the appeal is successful, the performance of the student on the task in question will be reviewed by the Principal (or delegate) with respect to the student's performance on all other tasks that he/she has completed in the course. If the task result deviates significantly from the student's historical result pattern then the Principal may delete that mark and order an estimate

Term 1, 2022	Term 2, 2022	Term 3, 2022
Investigating Ancient History	Case Studies	Features of Ancient Societies

Ancient History Year 11 Outcomes to be assessed:

AH11-1 describes the nature of continuity and change in the ancient world

AH11-2 proposes ideas about the varying causes and effects of events and developments

AH11-3 analyses the role of historical features, individuals and groups in shaping the past

AH11-4 accounts for the different perspectives of individuals and groups

AH11-5 examines the significance of historical features, people, places, events and developments of the ancient world

AH11-6 analyses and interprets different types of sources for evidence to support an historical account or argument

AH11-7 discusses and evaluates differing interpretations and representations of the past

AH11-8 plans and conducts historical investigations and presents reasoned conclusions, using relevant evidence from a range of sources

AH11-9 communicates historical understanding, using historical knowledge, concepts and terms, in appropriate and well-structured forms

AH11-10 discusses contemporary methods and issues involved in the investigation of ancient history

Year 11 Biology

Term 1, 2022	Term 2, 2022	Term 3, 2022
Cells as the base of life	Organisation of living things and biological diversity	Ecosystem Dynamics

Biology Year 11 Outcomes to be assessed

A student,

BIO11-1 develops and evaluates questions and hypotheses for scientific investigation

BIO11-2 designs and evaluates investigations in order to obtain primary and secondary data and information

BIO11-3 conducts investigations to collect valid and reliable primary and secondary data and information

BIO11-4 selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media

BIO11-5 analyses and evaluates primary and secondary data and information

BIO11-6 solves scientific problems using primary and secondary data, critical thinking skills and scientific processes

BIO11-7 communicates scientific understanding using suitable language and terminology for a specific audience or purpose

BIO11-8 describes single cells as the basis for all life by analyzing and explaining cells' ultrastructure and biochemical processes

BIO11-9 explains the structure and function of multicellular organisms and describes how the coordinated activities of cells, tissues and organs contribute to macroscopic processes in organisms

BIO11-10 describes biological diversity by explaining in terms of specialization for selected habitats and evolution of species

y analyses ecosystem dynamics and the interrelationships of organisms within the ecosystem

BIO11-11 analyses ecosystem dynamics and the interrelationships of organisms within the ecosystem

Year 11 Business Studies

Scope and sequence of topics to be taught in Year 11 Business Studies:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Nature of Business	Business Management	Business Planning

Business Studies Year 11 Outcomes to be assessed:

A student;

- P1** discusses the nature of business, its role in society and types of business structure
- P2** explains the internal and external influences on businesses
- P3** describes the factors contributing to the success or failure of small to medium enterprises
- P4** assesses the processes and interdependence of key business functions
- P5** examines the application of management theories and strategies
- P6** analyses the responsibilities of business to internal and external stakeholders
- P7** plans and conducts investigations into contemporary business issues
- P8** evaluates information for actual and hypothetical business situations
- P9** communicates business information and issues in appropriate formats
- P10** applies mathematical concepts appropriately in business situations

Year 11 Chemistry

Subject Year 11 Chemistry 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Chemistry:

Term 1, 2022	Term 2, 2022		Term 3, 2022
Properties of the structure of matter	Quantitative Chemistry	Chemical reactions	Drivers of chemical reactions

Chemistry Year 11 Outcomes to be assessed

A student,

CH11-1 develops and evaluates questions and hypotheses for scientific investigation

CH11-2 designs and evaluates investigations in order to obtain primary and secondary data and information

CH11-3 conducts investigations to collect valid and reliable primary and secondary data and information

CH11-4 selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media

CH11-5 analyses and evaluates primary and secondary data and information

CH11-6 solves scientific problems using primary and secondary data, critical thinking skills and scientific processes

CH11-7 communicates scientific understanding using suitable language and terminology for a specific audience or purpose

CH11-8 explores the properties and trends in the physical, structural and chemical aspects of matter

CH11-9 describes, applies and quantitatively analyses the mole concept and stoichiometric relationships

CH11-10 explores the many different types of chemical reactions, in particular the reactivity of metals, and the factors that affect the rate of chemical reactions

CH11-11 analyses the energy considerations in the driving force for chemical reactions

Year 11 Community and Family Studies

Subject Year 11 CAFS 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Community and Family Studies:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Resource Management	Individuals and Groups	Families and Communities

Community and Family Studies Year 11 Outcomes to be assessed

A student,

P1.1 describes the contribution an individual's experiences, values, attitudes and beliefs make to the development of goals

P1.2 proposes effective solutions to resource problems

P2.1 accounts for the roles and relationships that individuals adopt within groups

P2.2 describes the role of the family and other groups in the socialisation of individuals

P2.3 examines the role of leadership and group dynamics in contributing to positive interpersonal relationships and achievement

P2.4 analyses the interrelationships between internal and external factors and their impact on family functioning

P3.1 explains the changing nature of families and communities in contemporary society

P3.2 analyses the significance of gender in defining roles and relationships

P4.1 utilises research methodology appropriate to the study of social issues

P4.2 presents information in written, oral and graphic form

P5.1 applies management processes to maximise the efficient use of resources

P6.1 distinguishes those actions that enhance wellbeing

P6.2 uses critical thinking skills to enhance decision-making

Year 11 Design and Technology

Subject Year 11 Design and Technology 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Weighting Total				40	60	100%	

Scope and sequence of topics to be taught in Year 11 Design and Technology:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Design Theory / Processes	Research and Marketing	Designing and Producing

Design and Technology Year 11 Outcomes to be assessed:

A student,

- P1.1 examines design theory and practice, and considers the factors affecting designing and producing in design projects
- P2.1 identifies design and production processes in domestic, community, industrial and commercial settings
- P2.2 explains the impact of a range of design and technology activities on the individual, society and the environment through the development of projects
- P3.1 investigates and experiments with techniques in creative and collaborative approaches in designing and producing
- P4.1 uses design processes in the development and production of design solutions to meet identified needs and opportunities
- P4.2 uses resources effectively and safely in the development and production of design solutions
- P4.3 evaluates the processes and outcomes of designing and producing
- P5.1 uses a variety of management techniques and tools to develop design projects
- P5.2 communicates ideas and solutions using a range of techniques
- P5.3 uses a variety of research methods to inform the development and modification of design ideas
- P6.1 investigates a range of manufacturing and production processes and relates these to aspects of design projects
- P6.2 evaluates and uses computer-based technologies in designing and producing

Year 11 Earth and Environmental Science

Subject Year 11 Earth and Environment Science 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Earth and Environmental Science:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Earth’s resources	Plate tectonics and energy transformers	Human impacts

Earth and Environmental Science Year 11 Outcomes to be assessed:

A Student,

EES11-1 develops and evaluates questions and hypotheses for scientific investigation

EES11-2 designs and evaluates investigations in order to obtain primary and secondary data and information

EES11-3 conducts investigations to collect valid and reliable primary and secondary data and information

EES11-4 selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media

EES11-5 analyses and evaluates primary and secondary data and information

EES11-6 solves scientific problems using primary and secondary data, critical thinking skills and scientific processes

EES11-7 communicates scientific understanding using suitable language and terminology for a specific audience or purpose

EES11-8 describes the key features of the Earth's systems, including the geosphere, atmosphere, hydrosphere and biosphere and how they are interrelated

EES11-9 describes the evidence for the theory of plate tectonics and the energy and geological changes that occur at plate boundaries

EES11-10 describes the factors that influence how energy is transferred and transformed in the Earth's systems

EES11-11 describes human impact on the Earth in relation to hydrological processes, geological processes and biological changes

Year 11 English Extension 1

Scope and sequence of topics to be taught in Year 11 English Extension:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Texts, culture and value: Power and Morality		

English Extension 1 Year 11 outcomes to be assessed:

A student:

- EE11-1A** demonstrates and applies considered understanding of the dynamic relationship between text, purpose, audience and context, across a range of modes, media and technologies
- EE11-2B** analyses and experiments with language forms, features and structures of complex texts, evaluating their effects on meaning in familiar and new contexts
- EE11-3C** thinks deeply, broadly and flexibly in imaginative, creative, interpretive and critical ways to respond to, compose and explore the relationships between sophisticated texts
- EE11-4C** develops skills in research methodology to undertake effective independent investigation
- EE11-5D** articulates understanding of how and why texts are echoed, appropriated and valued in a range of contexts
- EE11-6E** reflects on and assesses the development of independent learning gained through the processes of research, writing and creativity

Term 1, 2022	Term 2, 2022	Term 3, 2022
Reading to Write	Narratives that shape our world	Critical Study of Literature

English Advanced Year 11 Outcomes to be assessed:

A student:

- EA11-1** responds to, composes and evaluates complex texts for understanding, interpretation, critical analysis, imaginative expression and pleasure
- EA11-2** uses and evaluates processes, skills and knowledge required to effectively respond to and compose texts in different modes, media and technologies
- EA11-3** analyses and uses language forms, features and structures of texts considering appropriateness for specific purposes, audiences and contexts and evaluates their effects on meaning
- EA11-4** strategically uses knowledge, skills and understanding of language concepts and literary devices in new and different contexts
- EA11-5** thinks imaginatively, creatively, interpretively and critically to respond to, evaluate and compose texts that synthesise complex information, ideas and arguments
- EA11-6** investigates and evaluates the relationships between texts
- EA11-7** evaluates the diverse ways texts can represent personal and public worlds and recognises how they are valued
- EA11-8** explains and evaluates cultural assumptions and values in texts and their effects on meaning
- EA11-9** reflects on, evaluates and monitors own learning and adjusts individual and collaborative processes to develop as an independent learner

Reading to Write	Contemporary Possibilities	Close study of Literature

English Standard Year 11 Outcomes to be assessed:

A student:

- EN11-1** responds to and composes increasingly complex texts for understanding, interpretation, analysis, imaginative expression and pleasure
- EN11-2** uses and evaluates processes, skills and knowledge required to effectively respond to and compose texts in different modes, media and technologies
- EN11-3** analyses and uses language forms, features and structures of texts, considers appropriateness for purpose, audience and context and explains effects on meaning
- EN11-4** applies knowledge, skills and understanding of language concepts and literary devices into new and different contexts
- EN11-5** thinks imaginatively, creatively, interpretively and analytically to respond to and compose texts that include considered and detailed information, ideas and arguments
- EN11-6** investigates and explains the relationships between texts
- EN11-7** understands and explains the diverse ways texts can represent personal and public worlds
- EN11-8** identifies and explains cultural assumptions in texts and their effects on meaning
- EN11-9** reflects on, assesses and monitors own learning and develops individual and collaborative processes to become an independent learner

Year 11 Food Technology

Scope and sequence of topics to be taught in Year 11 Food Technology:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Nutrition	Food Quality	Food Availability and Selection

Food Technology Year 11 Outcomes to be assessed:

A student,

- P 1.1** identifies and discusses a range of historical and contemporary factors which influence the availability of particular foods
- P 1.2** accounts for individual and group food selection patterns in terms of physiological, psychological, social and economic factors
- P 2.1** explains the role of food nutrients in human nutrition
- P 2.2** identifies and explains the sensory characteristics and functional properties of food
- P 3.1** assesses the nutrient value of meals/diets for particular individuals and groups
- P 3.2** presents ideas in written, graphic and oral form using computer software where appropriate.
- P4.1** selects appropriate equipment, applies suitable techniques, and utilises safe and hygienic practices when handling food
- P4.2** plans, prepares and presents foods which reflect a range of the influences on food selection
- P4.3** selects foods, plans and prepares meals/diets to achieve optimum nutrition for individuals and groups
- P4.4** applies an understanding of the sensory characteristics and functional properties of food to the preparation of food products
- P 5.1** generates ideas and develops solutions to a range of food situations

Year 11 Industrial Technology Timber and Furniture Products

Subject Year 11 Industrial Technology – Timber & Furniture Products 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?
				Knowledge and understanding of the organisation and management of, and manufacturing processes and techniques used by, the focus area.	Knowledge, skills, understanding in designing, managing, problem-solving, communicating and the safe use of manufacturing processes/ techniques through the design and production of a quality Major Project. Scope and sequence of topics to be taught in Year 11 Industrial Technology:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Workshop safety and management Industry Study	Design management, communication and production – Hallway table	Design, management, communication and production – Hallway table

Industrial Technology Year 11 Outcomes to be assessed:

A student:

- P1.1** describes the organisation and management of an individual business within the focus area industry
- P2.1** identifies design and production processes in domestic, community, industrial and commercial settings
- P2.1** describes and uses safe working practices and correct workshop equipment maintenance techniques
- P2.2** works effectively in team situations
- P3.1** sketches, produces and interprets drawings in the production of projects
- P3.2** applies research and problem-solving skills
- P3.3** demonstrates appropriate design principles in the production of projects
- P4.1** demonstrates a range of practical skills in the production of projects
- P4.2** demonstrates competency in using relevant equipment, machinery and processes
- P4.3** identifies and explains the properties and characteristics of materials/components through the production
- P5.1** uses communication and information processing skills
- P5.2** uses appropriate documentation techniques related to the management of projects
- P6.1** identifies the characteristics of quality manufactured products
- P6.2** identifies and explains the principles of quality and quality contro
- P7.1** identifies the impact of one related industry on the social and physical environment
- P7.2** identifies the impact of existing, new and emerging technologies of one related industry on society and the environment

Year 11 Investigating Science

Subject Year 11 Investigating Science 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?
				Knowledge and understanding of the organisation and management of, and manufacturing processes and techniques used by, the focus area. Scope and sequence of topics to be taught in Year 11 Investigating Science:

Term 1, 2022	Term 2, 2022	Term 3, 2022
M1 – Cause and effect observing	M2 – Cause and effect – inferences and generalisations M3- Scientific models	M4- Theories and Laws

Investigating Science Year 11 Outcomes to be assessed:

A student:

INS11-1 develops and evaluates questions and hypotheses for scientific investigation

INS11-2 designs and evaluates investigations in order to obtain primary and secondary data and information

INS11-3 conducts investigations to collect valid and reliable primary and secondary data and information

INS11-4 selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media

INS11-5 analyses and evaluates primary and secondary data and information

INS11-6 solves scientific problems using primary and secondary data, critical thinking skills and scientific processes

INS11-7 communicates scientific understanding using suitable language and terminology for a specific audience or purpose

INS11-8 identifies that the collection of primary and secondary data initiates scientific investigations

INS11-9 examines the use of inferences and generalisations in scientific investigations

INS11-10 develops, and engages with, modelling as an aid in predicting and simplifying scientific objects and processes

INS11-11 describes and assesses how scientific explanations, laws and theories have developed

Year 11 Legal Studies

Subject Year 11 Legal Studies 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date due When do I have to complete the task?	Components and Weightings					Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Legal Studies:

Term 1, 2022	Term 2, 2022	Term 3, 2022
The Legal System	The Individual and the Law	Law in Practice

Legal Studies Year 11 Outcomes to be assessed:

A student,

P1 identifies and applies legal concepts and terminology

P2 describes the key features of Australian and international law

P3 describes the operation of domestic and international legal systems

P4 discusses the effectiveness of the legal system in addressing issues

P5 describes the role of law in encouraging cooperation and resolving conflict, as well as initiating and responding to change

P6 explains the nature of the interrelationship between the legal system and society

P7 evaluates the effectiveness of the law in achieving justice

P8 locates, selects and organises legal information from a variety of sources including legislation, cases, media, international instruments and documents

P9 communicates legal information using well-structured responses

P10 accounts for differing perspectives and interpretations of legal information and issues

Year 11 Mathematics Extension 1

Subject Year 11 Mathematics Extension 1 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date Due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Mathematics Extension 1:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Functions	Combinatorics, Calculus, Functions	Functions, Trigonometric Functions, Calculus

Mathematics Extension 1 Year 11 Outcomes to be assessed:

A student,

ME11-1 uses algebraic and graphical concepts in the modelling and solving of problems involving functions and their inverses

ME11-2 manipulates algebraic expressions and graphical functions to solve problems

ME11-3 applies concepts and techniques of inverse trigonometric functions and simplifying expressions involving compound angles in the solution of problems

ME11-4 applies understanding of the concept of a derivative in the solution of problems, including rates of change, exponential growth and decay and related rates of change

ME11-5 uses concepts of permutations and combinations to solve problems involving counting or ordering

ME11-6 uses appropriate technology to investigate, organise and interpret information to solve problems in a range of contexts

ME11-7 communicates making comprehensive use of mathematical language, notation, diagrams and graphs

Year 11 Mathematics Advanced

Subject Year 11 Mathematics Advanced 2022	Task number	Module, topics, task type What topic will I be assessed on and how will I be assessed?	Date Due When do I have to complete the task?	Components and Weightings			Syllabus outcomes Which course outcomes will be assessed in the task?

Scope and sequence of topics to be taught in Year 11 Mathematics Advanced:

Term 1, 2022	Term 2, 2022	Term 3, 2022
Functions and Calculus	Calculus and Trigonometric Functions	Statistics, Exponential and Logarithmic Functions

Mathematics Advanced Year 11 Outcomes to be assessed:

A student,

MA11-1 uses algebraic and graphical techniques to solve, and where appropriate, compare alternative solutions to problems

MA11-2 uses the concepts of functions and relations to model, analyse and solve practical problems

MA11-3 uses the concepts and techniques of trigonometry in the solution of equations and problems involving geometric shapes

MA11-4 uses the concepts and techniques of periodic functions in the solutions of trigonometric equations or proof of trigonometric identities

MA11-5 interprets the meaning of the derivative, determines the derivative of functions and applies these to solve simple practical problems

MA11-6 manipulates and solves expressions using the logarithmic and index laws, and uses logarithms and exponential functions to solve practical problems

MA11-7 uses concepts and techniques from probability to present and interpret data and solve problems in a variety of contexts, including the use of probability distributions

MA11-8 uses appropriate technology to investigate, organise, model and interpret information in a range of contexts

MA11-9 provides reasoning to support conclusions which are appropriate to the context

Year 11 Mathematics Standard

Term 1, 2022	Term 2, 2022	Term 3, 2022
Financial mathematics, Measurement, Algebra, Statistical Analysis	Measurement, Financial Mathematics, Statistical Analysis	Measurement, Financial Mathematics, Statistical Analysis

Mathematics Standard Year 11 Outcomes to be assessed:

A student,

MS11-1 uses algebraic and graphical techniques to compare alternative solutions to contextual problems

MS11-2 represents information in symbolic, graphical and tabular form

MS11-3 solves problems involving quantity measurement, including accuracy and the choice of relevant units

MS11-4 performs calculations in relation to two-dimensional and three-dimensional figures

MS11-5 models relevant financial situations using appropriate tools

MS11-6 makes predictions about everyday situations based on simple mathematical models

MS11-7 develops and carries out simple statistical processes to answer questions posed

MS11-8 solves probability problems involving multistage events

MS11-9 uses appropriate technology to investigate, organise and interpret information in a range of contexts

MS11-10 justifies a response to a given problem using appropriate mathematical terminology and/or calculations

Term 1, 2022	Term 2, 2022	Term 3, 2022
Self-introduction, Family & Pets	House, Neighbourhood and Friends	Hobbies/interests, Health & fitness, Making plans

Modern Greek (Beginners) Year 11 Outcomes to be assessed:

A student,

Interacting

- 1.1** establishes and maintains communication in Modern Greek
- 1.2** manipulates linguistic structures to express ideas effectively in Modern Greek
- 1.3** sequences ideas and information
- 1.4** applies knowledge of the culture of Greek-speaking communities to interact appropriately

Understanding Texts

- 2.1** understands and interprets information in texts using a range of strategies
- 2.2** conveys the gist of and identifies specific information in texts
- 2.3** summarises the main points of a text
- 2.4** draws conclusions from or justifies an opinion about a text
- 2.5** identifies the purpose, context and audience of a text
- 2.6** identifies and explains aspects of the culture of Greek-speaking communities in texts

Producing Texts

- 3.1** produces texts appropriate to audience, purpose and context
- 3.2** structures and sequences ideas and information
- 3.3** applies knowledge of diverse linguistic structures to convey information and express original ideas in Modern Greek
- 3.4** applies knowledge of the culture of Greek-speaking communities to the production of texts

Term 1, 2022	Term 2, 2022	Term 3, 2022
Investigating and Representing Histories	Meiji Restoration	The Romanovs

Modern History Outcomes to be assessed:

A student;

MH11-1 describes the nature of continuity and change in the modern world

MH11-2 proposes ideas about the varying causes and effects of events and developments

MH11-3 analyses the role of historical features, individuals, groups and ideas in shaping the past

MH11-4 accounts for the different perspectives of individuals and groups

MH11-5 examines the significance of historical features, people, ideas, movements, events and developments of the modern world

MH11-6 analyses and interprets different types of sources for evidence to support an historical account or argument

MH11-7 discusses and evaluates differing interpretations and representations of the past

MH11-8 plans and conducts historical investigations and presents reasoned conclusions, using relevant evidence from a range of sources

MH11-9 communicates historical understanding, using historical knowledge, concepts and terms, in appropriate and well-structured forms

MH11-10 discusses contemporary methods and issues involved in the investigation of modern history

Music for radio, film, television and multimedia	Jazz	Music for small ensembles

Music Year 11 Outcomes to be assessed:

A student,

P1 performs music that is characteristic of the topics studied

P2 observes, reads, interprets and discusses simple musical scores characteristic of topics studied

P3 improvises and creates melodies, harmonies and rhythmic accompaniments for familiar sound sources reflecting the cultural and historical contexts studied

P4 recognises and identifies the concepts of music and discusses their use in a variety of musical styles

P5 comments on and constructively discusses performances and compositions

P6 observes and discusses concepts of music in works representative of the topics studied

P7 understands the capabilities of performing media, explores and uses current technologies as appropriate to the topics studied

P8 identifies, recognises, experiments with and discusses the use of technology in music

P9 performs as a means of self-expression and communication

P10 demonstrates a willingness to participate in performance, composition, musicology and aural activities

P11 demonstrates a willingness to accept and use constructive criticism

Term 1, 2022	Term 2, 2022	Term 3, 2022
Core: Better health for individuals	Core 2- Body in Motion	Options - First Aid and Fitness Choices

PDHPE Year 11 Outcomes to be assessed:

A student,

P1 identifies and examines why individuals give different meanings to health

P2 explains how a range of health behaviours affect an individual's health

P3 describes how an individual's health is determined by a range of factors

P4 evaluates aspects of health over which individuals can exert some control

P5 describes factors that contribute to effective health promotion

P6 proposes actions that can improve and maintain an individual's health

P7 explains how body systems influence the way the body moves

P8 describes the components of physical fitness and explains how they are monitored

P9 describes biomechanical factors that influence the efficiency of the body in motion

P10 plans for participation in physical activity to satisfy a range of individual needs

P11 assesses and monitors physical fitness levels and physical activity patterns

P12 demonstrates strategies for the assessment, management and prevention of injuries in first aid settings (Option 1)

P13 develops, refines and performs movement compositions in order to achieve a specific purpose (Option 2)

P14 demonstrates the technical and interpersonal skills necessary to participate safely in challenging outdoor recreation activities (Option 4)

P15 forms opinions about health-promoting actions based on a critical examination of relevant information

P16 uses a range of sources to draw conclusions about health and physical activity concepts

P17 analyses factors influencing movement and patterns of participation

Kinematics		Dynamics		Waves and thermodynamics	Electricity and magnetism

Physics Year 11 Outcomes to be assessed:

A student,

- PH11-1** develops and evaluates questions and hypotheses for scientific investigation
- PH11-2** designs and evaluates investigations in order to obtain primary and secondary data and information
- PH11-3** conducts investigations to collect valid and reliable primary and secondary data and information
- PH11-4** selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media
- PH11-5** analyses and evaluates primary and secondary data and information
- PH11-6** solves scientific problems using primary and secondary data, critical thinking skills and scientific processes
- PH11-7** communicates scientific understanding using suitable language and terminology for a specific audience or purpose
- PH11-8** describes and analyses motion in terms of scalar and vector quantities in two dimensions and makes quantitative measurements and calculations for distance, displacement, speed velocity and acceleration
- PH11-9** describes and explains events in terms of Newton's Law of Motion, the law of conservation of momentum and the law of conservation of energy
- PH11-10** explains and analyses waves and the transfer of energy by sound, light and thermodynamic principles
- PH11-11** explains and quantitatively and analyses electric fields, circuitry and magnetism

Module 1- Aquatics Module 9 - Healthy Lifestyle	Module 10- Individual games and sport applications	Module 5 - Fitness

Sport, Lifestyle and Recreation Year 11 Outcomes to be assessed:

A student,

- 1.1** applies the rules and conventions that relate to participation in a range of physical activities
- 1.2** explains the relationship between physical activity, fitness and healthy lifestyle
- 1.3** demonstrates ways to enhance safety in physical activity
- 1.5** critically analyses the factors affecting lifestyle balance and their impact on health status
- 2.1** explains the principles of skill development and training
- 2.2** analyses the fitness requirements of specific activities
- 3.1** selects appropriate strategies and tactics for success in a range of movement contexts
- 3.2** designs programs that respond to performance needs
- 3.5** analyses personal health practices
- 3.6** assesses and responds appropriately to emergency care situations
- 4.1** plans strategies to achieve performance goal
- 4.4** demonstrates competence and confidence in movement contexts
- 4.5** recognises the skills and abilities required to adopt roles that support health, safety and physical activity

Design	Properties & Performance of Textiles	Australian Textile, Clothing, Footwear & Allied Industries

Textiles and Design Year 11 Outcomes to be assessed:

A student,

- P1.1** describes the elements and principles of design and uses them in a variety of applications
- P1.2** identifies the functional and aesthetic requirements and features of a range of textile items
- P2.1** demonstrates the use of a variety of communication skills, including computer-based technology
- P2.2** develops competence in the selection and use of appropriate manufacturing techniques and equipment
- P2.3** manages the design and manufacture of textile projects
- P3.1** identifies properties of a variety of fabrics, yarns and fibres
- P3.2** justifies the selection of fabrics, yarns and fibres for end-uses
- P4.1** identifies and selects textiles for specific end-uses based on analysis of experimentation
- P5.1** examines the status of the Australian Textile, Clothing, Footwear and Allied Industries within the global context
- P5.2** investigates the range of career options in design, consumerism, manufacturing and retail sectors of the Australian Textile, Clothing, Footwear and Allied Industries
- P6.1** identifies and appreciates the factors that contribute to the quality and value of textiles in society

Year 11 Visual Arts

ULTIMO RTO 90072 VET COURSE ASSESSMENT SCHEDULES

Preliminary 2022 – HSC 2023

Vocational Education and Training (VET) Courses

Vocational Education and Training (VET) courses are offered as part of the Higher School Certificate (HSC) or Record of School Achievement (RoSA). VET courses are designed to deliver workplace-specific skills and knowledge and cover a wide range of careers and industries. VET courses for secondary students are developed by the NSW Education Standards Authority (NESA) and are based on national training packages.

VET courses allow students to gain both HSC or RoSA qualifications and a qualification recognised throughout Australia as part of the Australian Qualification Framework (AQF). These qualifications are widely recognised by industry, employers and tertiary training providers e.g. TAFENSW and Universities and will assist students to move easily between various education and training sectors and employment.

Public Schools NSW, Ultimo operates as a Registered Training Organisation (RTO) to deliver and assess VET qualifications to secondary students.

It is mandatory for all students studying a VET course to create a Unique Student Identifier (USI). Students will require a form of identification, such as a Medicare Card, Birth Certificate, Driver's License or a valid passport for the creation of the USI.

Board Developed VET courses are classified as Category B subjects and ONLY ONE may contribute to the calculation of the Australian Tertiary Admission Rank (ATAR). These courses have an optional HSC examination. Students wishing to include a VET course in the ATAR calculation must sit the HSC examination.

Board Developed VET courses have specified workplace requirements and include industry specific mandatory work placement (35 hours per 120 hours of delivery) or occasionally simulated workplace hours at school.

Board Endorsed VET courses do count towards the HSC or RoSA but do not have HSC examinations therefore do not count in the calculation of the ATAR.

Board Endorsed VET Courses have either mandatory or recommended industry specific work placement.

Assessment in all VET courses is competency based. The student is assessed on what they can do (the skills) and what they know (the knowledge) that will equip them in the workplace. Students who have successfully achieved competency will have the skills and knowledge they need to complete workplace activities in a range of different situations and environments, to an industry standard of performance that is expected in the workplace.

Competency-based training is based on performance standards that have been set by industry. Competency-based assessment materials are designed to determine if each learner has achieved all the outcomes (skills and knowledge). Students will receive documentation showing the competencies achieved for the VET course undertaken.

If the student has already completed part of the course elsewhere, or have previous life or work experience in the relevant industry, he or she may be eligible for Recognition of Prior Learning (RPL) for part of the course, or for 35 Hours work placement in the HSC course. The student does not have to repeat the training or assessment but must produce evidence of competence (which may be demonstrated during a skills and knowledge assessment). The VET committee consisting of the VET teacher, VET Coordinator and a member of the senior executive will determine if the student is eligible.

If a student has completed a unit of competency with another RTO and the student can supply evidence of the same or an equivalent competency, credit transfer is awarded (common examples include a white card course, first aid certificate or a barista course).

Due to the specific requirements of a VET course it is recommended students speak to the VET Coordinator or Careers Adviser before choosing the course to ensure they are fully aware of the requirements.

Dear Mr & Mrs [PARENT NAME]

OFFICIAL WARNING – Non-completion of a Preliminary Course

This letter is to advise that your daughter, [STUDENT NAME], is in danger of not meeting the requirements for satisfactory completion of the Preliminary course in [SUBJECT].

The NSW Education Standards Authority (NESA) requires schools to issue students who are in danger of not meeting course requirements with official warnings in order to give them the opportunity to correct the problem. A minimum of two course-specific warnings must be issued prior to a final non-completion of course determination being made.

This is the 1st official warning we have issued notifying you that [STUDENT NAME] is at risk of not completing the above course. Previous warning(s) have been sent to you.

Criteria for satisfactory completion of a course

For a student to satisfactorily complete a course, NESA requires the principal to have sufficient evidence that the student has:

- (a) followed the course developed or endorsed by NESA; and
- (b) applied herself with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- (c) achieved some or all of the course outcomes.

Where it is determined that a student has not met the course completion requirements, they place themselves at risk of receiving a determination of non-completion of course requirements. This will mean that the course will not be listed on the student's Record of Achievement and may affect the student's eligibility for the Higher School Certificate. It may also mean that the student is unable to proceed to the Higher School Certificate course if she has not satisfactorily completed the Preliminary Course.

[STUDENT NAME] is not currently meeting one or more of these requirements. In particular, she [DETAILS OF WORK/TASK THAT IS INCOMPLETE].

The following tasks or requirements need to be completed by [STUDENT NAME] to correct the problem.

Assessment Variation Form 1

Application for alternative assessment task/time

Tasks are scheduled well ahead of time to give students the best opportunity to prepare for best performance.

Students unable to sit any one of these assessment tasks due to **illness** or **individual circumstances** must apply on this form for special consideration as outlined in the Assessment Guide issued to each student. Failure to comply may result in a zero mark for that assessment task:
